Summary

Proficient senior software developer with a Bachelor's degree in Software Engineering and over 5 years of professional experience. Specializing in frontend development using JavaScript and TypeScript. Possesses additional proficiency in building backend components using Node.js. Has a successful history of handling projects with varying scales. Demonstrates teamwork, result-oriented focus, and effective leadership capabilities. Not afraid of learning new tech stack and solving challenging tasks.
I am proud to say I was valued in every team which I participated in.

Experience

EPAM Systems
Project: Global Retail Company
Mar 2022 - Present (2 years, 1 month)
Position: Frontend Developer
Main Technologies: React Native, Next.js, Redux, TypeScript, JEST

About the Project:

- Internal application developed for iOS platform devices using React Native, designed specifically for bakery departments. The primary goal is to elevate employee productivity and efficiency, ultimately leading to a reduction in production costs.

- Store manager application crafted with Next.js, delivering comprehensive store performance information in a clear and understandable manner. The application is rich in tables and various types of graphs, ensuring a comfortable and effective analysis of metrics.

Responsibilities:

- Developing the frontend part of applications.
- Close collaboration with the UX/UI team in the discussion of design decisions.
- Providing architectural insights into built applications.

Achievements:

- Successfully developed an IOS application from scratch using React Native.
- Contributed significantly to the frontend development of an existing application with Next.js.
- Introduced architectural solutions to the development process.

EPAM Systems
Project: Bank (Finance domain)
Oct 2020 - Mar 2022 (1 year 6 months)
Position: Frontend Developer
Main Technologies: React, Redux, TypeScript, Styled Components, JEST

About the Project:

- Web banking application developed in React for one of the largest banks at the country level. This application encompasses a comprehensive range of banking services within a closely integrated ecosystem. The frontend development team consists of over 300 developers united by the SAFE (Scaled Agile Framework) methodology.

Responsibilities:

- Developing the investments section for the web banking application.
- Conducting interviews for frontend positions.
- Onboarding new team members.

Achievements:

- Proposed and implemented a solution that replaced a legacy approach, significantly increasing the speed of new feature development.
- Developed a crucial part of the investments section.
- Advocated for best practices within the team, including unit testing, code review, and clean code.

Complex Info
Project: International bet games platform
May 2019 - October 2020 (1 year 6 months)
Position: Frontend Developer
Main Technologies: JavaScript, HTML, CSS, Canvas, Jasmine.js, C#

About the Project:

- The bet games platform is a comprehensive ecosystem, encompassing a full circle of components. It spans from lottery games utilizing browser technologies to managerial tools and money management services developed using Node.js and C#. Operating internationally, the platform extends its reach to more than 15 countries.

Responsibilities:

- Developing various rich-in-animation bet games in a browser environment.
- Conducting interviews for frontend positions.
- Onboarding new team members.

Achievements:

- Successfully delivered several projects to production.
- Selected and conducted interviews with candidates for Frontend positions.
- Onboarded and led three new team members.
- Developed an administration UI tool for creating new data in corresponding databases using C# and Windows Forms.

Education

Bachelor's Degree in Software engineering
Federal State Educational Institution of Higher Education *"Nizhny Novgorod State University of Architecture and Civil Engineering"*

Diploma of professional training
in "Informational systems (professional programming)"
Federal State Educational Institution of Higher Education *"State University of Nizhny Novgorod named after N.I. Lobachevsky"*
